

International Workshop on the Qualitative Theory of Differential Equations

QUALITDE – 2024

December 21 – 23, 2024, Tbilisi, Georgia

*A. Razmadze Mathematical Institute of I. Javakishvili Tbilisi State University
2, Merab Aleksidze II Lane, Tbilisi 0193, Georgia*

Program

December 21, 2024

- 10:45 – 11:00 **Opening of the Workshop**
- 11:00 – 11:30 **I. Kiguradze** – On Two-Point Boundary Value Problems for Higher Order Singular Advanced Differential Equations
- 11:30 – 12:00 **T. Jangveladze** – On One Diffusion System of Nonlinear Partial Differential Equations
- 12:00 – 12:30 **N. Partsvania** – Initial Value Problem on an Infinite Interval for First Order Advanced Differential Equations
- 12:30 – 13:00 **Coffee Break**
- 13:00 – 15:00 **Overview of the talks of participants in absentia**
- P. Omari** – Positive Solutions of Superlinear Mean Curvature Problems in Planar Domains: Topological Versus Variational Approach
- R. I. Kadiev, A. Ponosov** – Nonlinear Functional Integral Itô Equations: Existence and Uniqueness
- A. Lomtadze** – On Bounded and Periodic Solutions of Planar Systems of ODE
- R. Hakl, P. J. Torres** – The Inverse Problem for Periodic Travelling Waves of the Linear 1D Shallow-Water Equations
- J. Šremr** – On Lyapunov and Krasovskii Stability/Instability of Pendulum Equation with Non-Constant Coefficients
- Z. Došlá, M. Marini, S. Matucci** – Boundary Value Problems on the Half-Line Involving Generalized Curvature Operators
- S. Staněk** – Dirichlet Problem for Singular Fractional Differential Equations with Given Maximal Value for Positive Solutions
- V. Mikhailets, O. Atlasiuk** – ODE-Systems with Boundary Inhomogeneous Conditions Containing Higher-Order Derivatives
- T. Kiguradze, A. Almutairi** – Ill-Posed Initial-Boundary Value Problems for Linear Hyperbolic Systems of Second Order
- Z. Kiguradze** – Deep Neural Network for Approximate Solution of One System of Nonlinear Integro-differential Equations
- E. Bravyi** – On the Solvability of Linear Functional Differential Equations of the First and Second Orders
- A. Rontó, M. Rontó, N. Rontóová, I. Varga** – On Investigation of Non-Linear Differential Systems with Mixed Boundary Conditions

December 22, 2024

- 11:00 – 11:30 **S. Kharibegashvili** – Antiperiodic in Time Boundary Value Problem for One Class of Nonlinear High-Order Partial Differential Equation
- 11:30 – 12:00 **T. Tadumadze, T. Shavadze** – On the Optimization Problem for the Quasi-Linear Neutral Functional-Differential Equation with the Discontinuous Initial Condition
- 12:00 – 12:30 **O. Jokhadze, S. Kharibegashvili** – On the Dirichlet Type Problem for the Inhomogeneous Equation of String Oscillation
- 12:30 – 13:00 **M. Manjikashvili, S. Mukhigulashvili** – Two Point Boundary Value Problems for the Fourth Order Ordinary Differential Equations
- 13:00 – 13:30 **Coffee Break**
- 13:30 – 15:30 **Overview of the talks of participants in absentia**
- N. A. Izobov, A. V. Il'in** – Anti-Perron Effect of Changing Characteristic Exponents in Differential Systems
- A. A. Bondarev, I. N. Sergeev** – Radial Properties of Stability and Instability of a Differential System
- E. K. Makarov** – Some Sufficient Conditions for Almost Reducibility of Millionshchikov Systems
- V. A. Pokhachevskiy, V. V. Bykov** – On the Baire Classification of the Weak Oscillation Exponents of Roots and Hypermultiple Roots
- A. V. Lipnitskii** – On Instability of Linear Differential Systems with Smooth Dependence on a Parameter
- A. N. Vetokhin** – On Non-Belonging to the Second Baire Class of the Topological Entropy of One Family of Non-Autonomous Dynamical Systems on an Interval Continuously Depending on a Real Parameter
- A. K. Demenchuk** – The Structure of Strongly Irregular Solutions of the Quasiperiodic Linear Algebraic System
- M. M. Vaskouski, A. A. Levakov** – Stability of Solutions of One-Dimensional Stochastic Differential Equations Controlled by Rough Paths
- E. Musafirov, A. Grin, A. Pranevich** – On Admissible Perturbations of 3D Quadratic ODE System with an Infinite Number of Limit Cycles
- F. Konopka** – Median and p -Median
- N. Kasimova, O. Kapustyan** – Approximate Solution of the Optimal Control Problem for a Parabolic Differential Inclusion with Fast-Oscillating Coefficients on Infinite Interval
- O. Stanzhytskyi, D. Shtefan, R. Uteshova** – Asymptotic Equivalence of Infinite-Dimensional Linear Stochastic Systems
- O. Pravdyvyi, A. Stanzhytskyi, O. Martynyuk** – Limiting Behavior of Invariant Measures of Stochastic Functional-Differential Neutral Equations in Hilbert Space

December 23, 2024

11:00 – 13:00 **Overview of the talks of participants in absentia**

J. Jaroš, T. Kusano – Oscillation Theory of Nonlinear Differential Equations of Emden--Fowler Type with Variable Exponents

J. Jaroš, T. Kusano, T. Tanigawa – Properties of Oscillatory Solutions of Second Order Half-Linear Differential Equations

I. V. Astashova – Once More on Typicality and Atypicality of Power-Law Asymptotic Behavior of Solutions to Emden--Fowler Type Differential Equations

I. V. Astashova, A. V. Filinovskiy, D. A. Lashin – On Smooth Controllability in Parabolic Control Problem with a Pointwise Observation

V. Bashurov – On Oscillation of Solutions to One Neutral Type Differential Equation

S. Ezhak, M. Telnova – On Attainability on the Potential from the Space $W_2^{-1}[0,1]$ of the Lower Bound of the First Eigenvalue of a Sturm-Liouville Problem

D. A. Gabidullin – On the Stability Conditions of a Nonlinear Biological Epidemic Model

E. Korobko – Application of the Retract Principle to Find Solutions of Discrete Nonlinear Equations

P. Benner, S. Chuiko, O. Nesmelova – Autonomous Seminonlinear Boundary Value Problems with Switchings at Non-Fixed Times

S. Chuiko, A. Chuiko, N. Popov – Adomian Decomposition Method in Theory of Nonlinear Periodic Boundary Value Problems

13:00 – 13:30 **Coffee Break**

13:30 – 16:00 **Overview of the talks of participants in absentia**

V. P. Maksimov – On Control Problems for Systems with Fractional Derivative and Aftereffect

V. M. Evtukhov, O. O. Maksymov – Asymptotic Representation for Solutions of Systems of Differential Equations with Rapidly Varying Nonlinearities

M. A. Bilozerovala, O. O. Chepok – Regularly Varying Solutions of Differential Equations of the Second Order with Nonlinearities of Exponential Types

M. A. Bilozerovala, N. V. Sharai – Asymptotic Representations of Solutions to Differential Equations of the Fourth Order with Nonlinearities, Close to Regularly Varying

S. V. Golubev – Asymptotic Behaviour of Rapidly Changing Solutions of Fourth-Order Differential Equation with Rapidly Changing Nonlinearity

A. Vorobiova – Regularly Varying Solutions of Differential Equations of the Second Order with Nonlinearities of Exponential Types

M. Horodnii – Bounded Solutions of a Linear Differential Equation with Piecewise Constant Operator Coefficients

Zh. Kadirbayeva – An Efficient Numerical Method for Solving Problem for Impulsive Differential Equations with Loadings Subject to Multipoint Conditions

O. Kurylko, O. Perehuda, O. Boryseiko – Finding of Periodic Points of Stokes Flow with a Complex Distribution of Motion Velocities of Rectangular Cavity Walls

Yu. Loveikin, A. Sukretna – Approximate Averaged Bounded Feedback Control with Two Switching Points for a Parabolic Process

S. Temesheva, P. Abdimanapova – On the Solvability of a Family of Nonlinear Two-Point Boundary Value Problems for Systems of Integro-Differential Equations and its Application

R. Taranets, M. Chugunova – On a Control-Volume Model for Fiber Coating

F. A. Asrorov, O. V. Perehuda, V. V. Zubenko – Invariant Toroidal Manifolds of One Class of Discontinuous Dynamical Systems

R. Lakhva, V. Mogylova, V. Kravets – The Averaging Method for Optimal Control Problems of Systems of Integro-Differential Equations

G. Petryna, A. Murzabaeva, Z. Khaletska – Approximation of Stochastic Systems with Integral-Type Delay by Stochastic Systems without Delay
